PROFESSIONAL SUMMARY

MSc Accounting & Finance (Merit) graduate and ACCA student with over a year of UK experience supporting multi-entity accounting, accounts payable, reconciliations, payments and month-end activities. Experienced in preparing financial information for management and external auditors, with proficiency in Excel and ERP systems. Developed an independent financial statement analysis project using Python and AI-assisted tools.

KEY SKILLS

Accounting and finance: Accounts payable; purchase order matching; VAT and general ledger coding; journals; bank, card and supplier reconciliations; BACS payments; accruals and prepayments; month-end support; multi-entity accounting

Audit and controls: External audit support; evidence review; financial statement analysis; financial statement assertions; payment pre-release checks; approval controls; proposed audit procedures

Technology and AI: Python; Excel (PivotTables, XLOOKUP, SUMIFS); AI research and workflow tools; Microsoft Dynamics NAV; SAP Concur

Languages: English (fluent)

PROFESSIONAL EXPERIENCE

ACCA Study and Independent Portfolio Project

Jul 2026 – Oct 2026

- Full-time exam preparation alongside the independent case study below.

Accounts Assistant

Mar 2025 – Jul 2026

Davy's of London, Greenwich, UK

- Supported accounts payable, journals, reconciliations, payment processing and month-end work across four legal entities.
- Processed 200+ supplier invoices each month: matched purchase orders, coded VAT and general ledger entries, allocated costs by entity, handled supplier queries and reconciled statements.
- Prepared fortnightly BACS batches of approximately £400,000 in SAP Concur and Microsoft Dynamics NAV; completed pre-release checks and uploaded batches for authorised release within the approval process.
- Completed allocated bank and corporate card reconciliations, investigated differences and posted the related accounting entries.
- Posted SAP Concur-generated and supplier payment journals to Dynamics NAV; prepared schedules and information for accruals and prepayments prepared by the Finance Manager.
- Prepared accounting records for management review and supplied requested information to external auditors under the Finance Manager's oversight, giving first-hand experience of the audit process from the client side.
- Mentored new team members and improved recurring Excel workflows and templates using AI-assisted tools to reduce manual processing.

Mortgage Underwriter

Sep 2020 – Jul 2022

Sutherland Global Services Ltd, India

- Reviewed 100+ US mortgage applications each month against lending policy and compliance requirements, verifying credit histories, identity and Social Security number evidence, income, debt and property documents, and flagging fraud indicators.
- Met turnaround and documentation quality requirements in a high-volume environment.

INDEPENDENT PORTFOLIO PROJECT

Global Fashion Group S.A. Oct 2026

Financial Statement Analysis and Audit Risk Case Study

Independent educational project using public disclosures; no company records accessed and no audit procedures performed. Tools: Python, Excel, AI-assisted research. *muhammedyousufds.github.io/case-study.html*

- Compared FY2024–FY2025 figures across five consolidated financial statements using GFG's FY2025 annual report; analysed revenue, gross margin, inventory, provisions, working capital and Pro-Forma Cash. Built source-linked Python and Excel calculations and ran 76 defined checks comparing Python outputs with saved Excel values; all passed.
- Used AI to organise disclosures and draft selected observations, then checked sources and recalculated selected measures. Confirmed inventory provision coverage fell from 8.84% to 8.04% (–0.80 percentage points) and narrowed a supplier-finance explanation where public disclosures could not establish a link to working capital.
- Developed nine potential financial statement risk categories, mapped them to relevant assertions and drafted 45 proposed audit procedures. Prepared worked examples covering revenue and returns (IFRS 15), inventory valuation (IAS 2) and impairment (IAS 36), then compared themes separately with published Key Audit Matters.

EDUCATION AND QUALIFICATIONS

ACCA In progress

Association of Chartered Certified Accountants

Four exemptions awarded; Taxation (TX) passed. Studying Financial Reporting (FR), exam sitting December 2026; Audit & Assurance (AA) and Financial Management (FM) planned for March 2027.

MSc Accounting & Finance, Merit Sep 2022 – Mar 2024

Anglia Ruskin University, UK

Relevant modules: International Accounting, Applied Corporate Finance and Financial Strategy, UK Taxation, Auditing.

BCom Finance & Taxation Apr 2015 – Mar 2018

Aquinas College, India

ADDITIONAL TRAINING

Practical Accounting Training Programme (non-employment) Apr 2024 – Feb 2025

Future Connect Training & Recruitment Ltd, London, UK

- Completed structured practical training in bookkeeping, double-entry journals, bank reconciliations and VAT processes, using SME-style datasets to simulate real-world accounting workflows.
- Developed hands-on proficiency in Sage, Xero, QuickBooks and Excel through exercises covering ledger maintenance, invoice and credit note processing, reconciliations and management accounts preparation.
- Practised month-end close tasks, including journals, accruals, prepayments, VAT and supporting schedules, in a structured training environment.
